

APPLICATION TO MICROSOFT FOR USE OF THEIR SOFTWARE FREE AS A NONPROFIT. June/2020.

Dear Wanda, of Micro Soft Administration. Some years ago as the Secretary and one of the Directors of the nonprofit **Men Against Violence Against Women (MAVAW)**, I went through the process to register for the Micro Soft software to use free as a nonprofit, with TECH SOUP, your accepted organisation to manage the nonprofit eligibility qualification process.

After a while they said I was approved, but had to pay some money for them to send that approval to Micro Soft. Our members offer a free service to those in need and we use our personal monthly tax allowance of \$6,000.00 TT to do all our work, as we recognize that genuine and complete spiritual, philanthropic outreach must depend on God's Blessings. Whatever comes from humankind is lagniappe, in our humble opinion.

We have no employees, use volunteer help when required and no fees are given to the directors. Our annual budget is the money our members contribute personally to do the work we do, from their allowable monthly tax allowances. The legal copied PDF Documents at Upload No 160 is the proof of that, <https://www.archive.org/details/mavawregistereddata>.

We do not get a Government Grant or get funding from any other source. We absorb our expenses within our annual tax allowance, which allows us not to record it for tax purposes, since that is already tax exempted. We are fully philanthropic in our quest to reduce Violence in Society, seeking solutions to the problems, as opposed to giving charity as our main focus.

Our website is a Cloud Archive <https://www.archive.org/details/@mavawsec>, of which I am a member for 11 years now. This Archive is free to use and has over 330 Billion URL's on it. MAVAW therefore spends our personal money to do our work. That Archive has 160 Uploads of various outreaches and work done over the years by MAVAW, all available for free download and sharing, with the standard copyright guidelines, some of which are in desktop published PDF format and some of which are open for further development.

Upload No 160 has all the Legal and descriptive Data, which TECH SOUP Registration Form does not allow said information above to be entered. If after your perusal of that data, it qualifies MAVAW for your free software use, we thank you in advance for your kind consideration.

This Philanthropic, Spiritual, Man Work, is not going to stop in our men's lifetime and enough young men support us to complete our succession planning. Much thanks for your time.

MAVAW, the nonprofit organisation, has been recognized as a necessary product of a quantum of practice based philosophical research work, **46 plus years to date**, done in the area of the **BUILT ENVIRONMENT**, more specifically, the **Housing and Settlement Development Sector**, which unfortunately, is still not available in any learning institution worldwide, for any formal accreditation. **MAVAW therefore, is the opportunity to constantly and immediately disseminate the required sharing of evidence based research to all and sundry.**

This study in **ARCHITECTURE**, titled **"The Social Effects of and Construction Methods Employed in Community Lifestyles and Low Cost Housing and Settlement Development, respectively, using Modern Day Techniques, with an Accent on tropical Architecture"**, is being done by me Donald Donat Berment, email: donaldberment@gmail.com, Ph:1-868-383-6184.
